

SN54116, SN74116 DUAL 4-BIT LATCHES WITH CLEAR

DECEMBER 1972—REVISED MARCH 1988

- Two Independent 4-Bit Latches in a Single Package
- Separate Clear Inputs Provide One-Step Clearing Operation
- Dual Gated Enable Inputs Simplify Cascading Register Implementations
- Compatible for Use with TTL Circuits
- Input Clamping Diodes Simplify System Design

SN54116 . . . J OR W PACKAGE
SN74116 . . . N PACKAGE
(TOP VIEW)

description

These monolithic TTL circuits utilize D-type bistables to implement two independent four-bit latches in a single package. Each four-bit latch has an independent asynchronous clear input and a gated two-input enable circuit. When both enable inputs are low, the output levels will follow the data input levels. When either or both of the enable inputs are taken high, the outputs remain at the last levels setup at the inputs prior to the low-to-high-level transition at the enable input(s). After this, the data inputs are locked out.

The clear input is overriding and when taken low will reset all four outputs low regardless of the levels of the enable inputs.

The SN54116 is characterized for operation over the full military temperature range of -55°C to 125°C ; the SN74116 is characterized for operation from 0°C to 70°C .

FUNCTION TABLE
(EACH LATCH)

CLEAR	ENABLE		DATA	OUTPUT Q
	C1	C2		
H	L	L	L	L
H	L	L	H	H
H	X	H	X	Q_0
H	H	X	X	Q_0
L	X	X	X	L

H = high level, L = low level, X = irrelevant
 Q_0 = the level of Q before these input conditions were established.

logic symbol†

†This symbol is in accordance with ANSI/IEEE Std. 91-1984 and IEC Publication 617-12.

PRODUCTION DATA documents contain information current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

schematics of inputs and outputs

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)

Supply voltage, V_{CC} (see Note 1)	7 V
Input voltage	5.5 V
Operating free-air temperature range: SN54116 Circuits	-55°C to 125°C
SN74116 Circuits	0°C to 70°C
Storage temperature range	-65°C to 150°C

NOTE 1: Voltage values are with respect to network ground terminal.

recommended operating conditions

		SN54116			SN74116			UNIT
		MIN	NOM	MAX	MIN	NOM	MAX	
Supply voltage, V_{CC}		4.5	5	5.5	4.75	5	5.25	V
High-level output current, I_{OH}		-800			-800			μA
Low-level output current, I_{OL}		16			16			mA
Input pulse width, t_W	$\bar{C}1, \bar{C}2$	18			18			ns
	\bar{CLR}	18			18			
Data setup time, t_{SU}	High logic level	8			8			ns
	Low logic level	14			14			
Clear inactive-state setup time, t_{SU}		8			8			ns
Data release time, high-level data, $t_{release}$		2			2			ns
Data hold time, low-level data, t_H		8			8			
Operating free-air temperature, T_A		-55 125			0 70			$^{\circ}C$

electrical characteristics over recommended operating free-air temperature range (unless otherwise noted)

PARAMETER		TEST CONDITIONS [†]	MIN	TYP [‡]	MAX	UNIT	
V_{IH}	High-level input voltage		2			V	
V_{IL}	Low-level input voltage				0.8	V	
V_{IK}	Input clamp voltage	$V_{CC} = \text{MIN}, I_I = -12 \text{ mA}$			-1.5	V	
V_{OH}	High-level output voltage	$V_{CC} = \text{MIN}, V_{IH} = 2 \text{ V}, V_{IL} = 0.8 \text{ V}, I_{OH} = -800 \mu A$	2.4	3.4		V	
V_{OL}	Low-level output voltage	$V_{CC} = \text{MIN}, V_{IH} = 2 \text{ V}, V_{IL} = 0.8 \text{ V}, I_{OL} = 16 \text{ mA}$		0.2	0.4	V	
I_I	Input current at maximum input voltage	$V_{CC} = \text{MAX}, V_I = 5.5 \text{ V}$			1	mA	
I_{IH}	High-level input current	$\bar{C}1, \bar{C}2, \text{ or clear}$	$V_{CC} = \text{MAX}, V_I = 2.4 \text{ V}$		40		μA
		Any D			60		
I_{IL}	Low-level input current	$\bar{C}1, \bar{C}2, \text{ or clear}$	$V_{CC} = \text{MAX}, V_I = 0.4 \text{ V}$		-1.6		mA
		Any D, initial peak			-2.4		
		Any D, steady-state			-1.6		
I_{OS}	Short-circuit output current [§]	$V_{CC} = \text{MAX}$	SN54116	-20	-57	mA	
			SN74116	-18	-57		
I_{CC}	Supply current	$V_{CC} = \text{MAX},$ See Note 2	Condition A	60	100	mA	
			Condition B	40	70		

[†] For conditions shown as MIN or MAX, use the appropriate value specified under recommended operating conditions for the applicable device type.

[‡] All typical values are at $V_{CC} = 5 \text{ V}, T_A = 25^{\circ}C$.

[§] Not more than one output should be shorted at a time.

NOTE 2: With outputs open, I_{CC} is measured for the following conditions:

- A. All inputs grounded.
- B. All \bar{C} inputs are grounded and all other inputs are at 4.5 V.

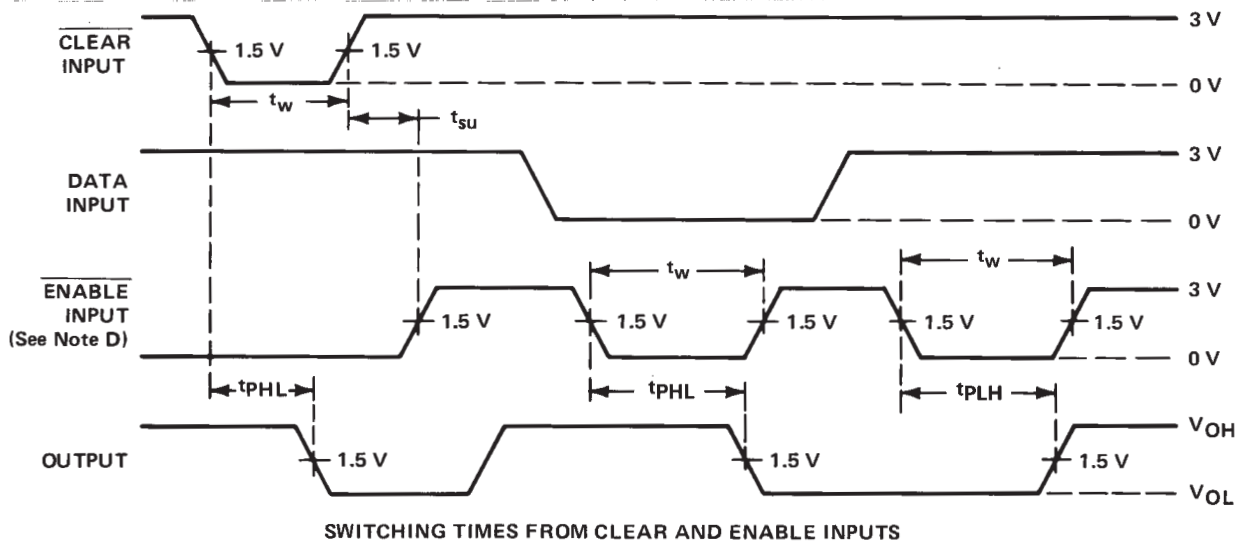

switching characteristics, $V_{CC} = 5 \text{ V}, T_A = 25^{\circ}C$

PARAMETER	FROM (INPUT)	TO (OUTPUT)	TEST CONDITIONS	MIN	TYP	MAX	UNIT
t_{PLH}	$\bar{C}1 \text{ or } \bar{C}2$	Any Q	$C_L = 15 \text{ pF},$ $R_L = 400 \Omega,$ See Figure 1	19 30		ns	
t_{PHL}				15 22			
t_{PLH}	Data	Q		10 15		ns	
t_{PHL}				12 18			
t_{PHL}	\bar{CLR}	Any Q		15 22		ns

PARAMETER MEASUREMENT INFORMATION

- NOTES: A. Input pulses are supplied by generators having the following characteristics: $t_r \leq 10$ ns, $t_f \leq 10$ ns, PRR = 1 MHz, duty cycle \leq 50%, $Z_{out} \approx 50\Omega$.
 B. C_L includes probe and jig capacitance.
 C. All diodes are 1N3064 or equivalent.
 D. The other enable input is low.
 E. Clear input is high.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
