## Dual 2-to-4-Line Decoder/Demultiplexer

### Type Features:

- Buffered inputs
- Typical propagation delay:

5.4 ns @  $V_{cc} = 5$  V,  $T_A = 25^\circ C$ ,  $C_L = 50 \mu F$

The RCA CD54/74AC139 and CD54/74ACT139 dual 2-to-4-line decoders/demultiplexers use the RCA ADVANCED CMOS technology. These devices contain two independent binary to one-of-four decoders, each with a single active-LOW enable Input ( $\bar{IE}$  or  $\bar{2E}$ ). Data on the select inputs (IA0 and IA1 or 2A0 and 2A1) cause one of the four normally HIGH outputs to go LOW.

If the enable input is HIGH, all four outputs remain HIGH. For demultiplexer operation, the enable input is the data input. The enable input also functions as a chip select when these devices are cascaded.

The CD74AC139 and CD74ACT139 are supplied in 16-lead dual-in-line plastic packages (E suffix) and in 16-lead dual-in-line small-outline plastic packages (M suffix). Both package types are operable over the following temperature ranges: Commercial (0 to  $70^\circ C$ ); Industrial (-40 to  $+85^\circ C$ ); and Extended Industrial/Military (-55 to  $+125^\circ C$ ).

The CD54AC139 and CD54ACT139, available in chip form (H suffix), are operable over the -55 to  $+125^\circ C$  temperature range.

### Family Features:

- Exceeds 2-kV ESD Protection - MIL-STD-883, Method 3015
- SCR-Latchup-resistant CMOS process and circuit design
- Speed of bipolar FAST®/AS/S with significantly reduced power consumption
- Balanced propagation delays
- AC types feature 1.5-V to 5.5-V operation and balanced noise immunity at 30% of the supply.
- $\pm 24\text{-mA}$  output drive current
  - Fanout to 15 FAST® ICs
  - Drives 50-ohm transmission lines

©FAST is a Registered Trademark of Fairchild Semiconductor Corp.

## Notes:

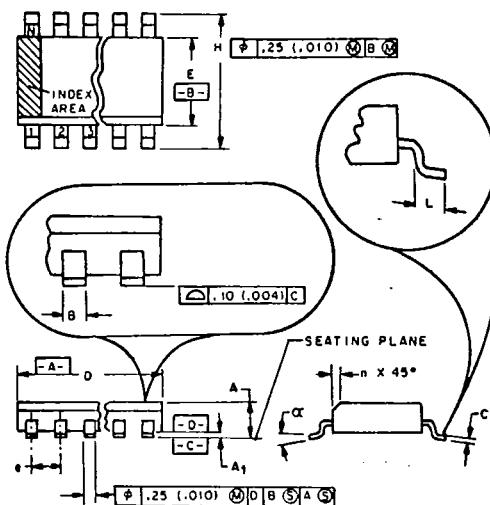

- Refer to JEDEC Publication No. 95 JEDEC Registered and Standard Outlines for Solid State Products, for rules and general information concerning registered and standard outlines, in Section 2.2.
- Protrusions (flash) on the base plane surface shall not exceed 0.010 in. (0.25 mm).
- The dimension shown is for full leads. "Half" leads are optional at lead positions  

$$1, N, \frac{N}{2}, \frac{N}{2} + 1.$$
- Dimension D does not include mold flash or protrusions. Mold flash or protrusions shall not exceed 0.010 in. (0.25 mm).
- E is the dimension to the outside of the leads and is measured with the leads perpendicular to the base plane (zero lead spread).
- Dimension E<sub>1</sub> does not include mold flash or protrusions.
- Package body and leads shall be symmetrical around

- center line shown in end view.
- Lead spacing e shall be non-cumulative and shall be measured at the lead tip. This measurement shall be made before insertion into gauges, boards or sockets.
  - This is a basic installed dimension. Measurement shall be made with the device installed in the seating plane gauge (JEDEC Outline No. GS-3, seating plane gauge). Leads shall be in true position within 0.010 in. (0.25 mm) diameter for dimension eA.
  - eB is the dimension to the outside of the leads and is measured at the lead tips before the device is installed. Negative lead spread is not permitted.
  - N is the maximum number of lead positions.
  - Dimension D<sub>1</sub> at the left end of the package must equal dimension D<sub>1</sub> at the right end of the package within 0.030 in. (0.76 mm).
  - For automatic insertion, any raised irregularity on the top surface (step, mesa, etc.) shall be symmetrical about the lateral and longitudinal package centerlines.

13

Dimensional Outlines

**Dual-In-Line Small-Outline Plastic Packages****NOTES:**

1. Refer to applicable symbol list.
2. Dimensioning and tolerancing per ANSI Y14.5M-1982.
3. "D" is a reference datum.
4. "A" and "B" are reference datums and do not include mold flash or protrusions. Mold flash or protrusions shall not exceed 0.15 mm (0.006 in.).
5. The chamfer on the body is optional. If it is not present, a visual index feature must be located within the cross-hatched area.
6. "L" is the length of terminal for soldering to a substrate.
7. "N" is the number of terminal positions.
8. Terminal numbers are shown for reference only.
9. Controlling dimensions: MILLIMETERS.
