description

Separate output enable inputs ($\overline{G}$) are provided for each of the two four-line sections of these data selectors/multiplexers.

The SN54HC352 is characterized for operation over the full military temperature range of −55°C to 125°C. The SN74HC352 is characterized for operation from −40°C to 85°C.

†Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
