

Product Detail Page

IPA-20

Number: 03.4240

Hi-fi power amplifier modules,
mono version with different output power. A 12V DC voltage (max. 18V \approx) is required for operation. **Common features**

- Short-circuit proof
- Thermal overload protection
- Reliable power amplifier IC technology with low THD

Other features

of IPA-20

- Bridge circuit (BTL)
- Muting circuit (no on/off switching noises)
- Internal speaker protection against DC and AC voltages

Technical Facts

RMS output power	15W _{RMS} /4Ω , 12W _{RMS} /8Ω
Music output power	20W _{MAX} /4Ω , 16W _{MAX} /8Ω
THD	0.1%/12W
Output impedance	4-8Ω
Frequency range	20-20,000Hz
Input impedance	70kΩ
Input voltage	80mV
S/N ratio	> 70dB
Standby current	100mA
Power supply	8-18V = /1.7A
Req. panel cutout	-
Dimensions	64x42x57mm
Weight	95g
