

Ultra Low Cost 3-Pin Microprocessor Reset

Description

The V6340 monitors the supply voltage of any electronic system, and generates the appropriate Reset signal. The threshold must be chosen to the minimum allowed voltage which guarantees the good functionality of the system. As long as V_{DD} stays upside this voltage level, the output stays inactive. If V_{DD} drops below V_{TH} , the output gets active. The threshold voltage may be obtained in different versions: 2.6V, 3.0V, 3.7V and 4.4V.

Features

- ☐ SOT-23 and TO-92 package
- ☐ Reset output state guaranteed down to $V_{DD} = 1V @ 25^{\circ}C$
- ☐ Low supply current: stays stable during switching
versions B, N, N: typ. $19\mu A$ at $V_{DD} = 5V$
other versions: typ. $38\mu A$ at $V_{DD} = 5V$
- ☐ $\pm 2.5\%$ voltage threshold accuracy
- ☐ High noise immunity
- ☐ No external components required
- ☐ Push-pull or Open drain output
- ☐ Pin compatible with MAX 809 in SOT-23, by appropriate layout on PCB
- ☐ Pin compatible with MC 33164 in TO-92
- ☐ TTL output compatibility

Applications

Applications needing a voltage detection:

- ☐ Computer electronics
- ☐ White / Brown goods
- ☐ Automotive electronics
- ☐ Industrial electronics
- ☐ Telecom systems
- ☐ Hand-held systems

Typical Operating Configuration

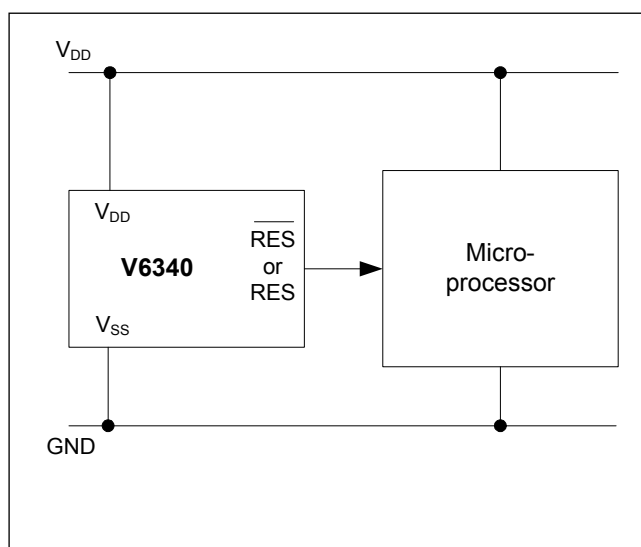

Fig. 1

Pin Assignment

Fig. 2

Absolute Maximum Ratings

Parameter	Symbol	Conditions
Voltage at V_{DD} to V_{SS}	V_{DD}	-0.3V to +8V
Minimum voltage at RES or \overline{RES}	V_{min}	$V_{SS} - 0.3V$
Maximum voltage at RES or \overline{RES}	V_{max}	$V_{DD} + 0.3V$
Storage Temperature Range	T_{STO}	-65°C to +150°C

Table 1

Stresses above these listed maximum ratings may cause permanent damages to the device. Exposure beyond specified operating conditions may affect device reliability or cause malfunction.

Handling Procedures

This device has built-in protection against high static voltages or electric fields; however, it is advised that normal precautions be taken as for any other CMOS component. Unless otherwise specified, proper operation can only occur when all terminal voltages are kept within the voltage range.

Operating Conditions

Parameter	Symbol	Min	Max	Unit
Operating Temperature ¹⁾	T_A	-40	+125	°C
Positive Supply Voltage ²⁾	V_{DD}	1	5.5	V

Table 2

¹⁾The maximum operating temperature is confirmed by sampling at initial device qualification. In production, all devices are tested at +25°C

²⁾ $V_{DD} = 1V$ guaranteed at +25°C (see Fig. 14 for more information)

Electrical Characteristics

$T_A = +25^\circ\text{C}$, unless otherwise specified

Parameter	Symbol	Test Conditions	Min.	Typ.	Max.	Unit
Supply current	I_{DD}	$V_{DD} = 5V$, output open		38	50	μA
Threshold voltage	V_{TH}	C, I, O	2.94	3.02	3.10	V
	V_{TH}	D, J, P	3.62	3.72	3.82	V
	V_{TH}	F, L, R	4.27	4.39	4.51	V
Threshold hysteresis	V_{HYS}			5		mV
RES Output Low Level	V_{OL}	$V_{DD} = 1.6V$, $I_{OL} = 1\text{mA}$		200	270	mV
	V_{OL}	$V_{DD} = 2.5V$, $I_{OL} = 2\text{mA}$		195	250	mV
	V_{OL}	$V_{DD} = 3.5V$, $I_{OL} = 3\text{mA}$		198	250	mV
	V_{OL}	$V_{DD} = 5V$, $I_{OL} = 4\text{mA}$		185	250	mV
RES Output High Level	V_{OH}	$V_{DD} = 1.6V$, $I_{OH} = -1\text{mA}$	1.25	1.36		V
	V_{OH}	$V_{DD} = 2.5V$, $I_{OH} = -1.5\text{mA}$	2.2	2.3		V
	V_{OH}	$V_{DD} = 3.5V$, $I_{OH} = -2.5\text{mA}$	3.15	3.27		V
	V_{OH}	$V_{DD} = 5V$, $I_{OH} = -3.5\text{mA}$	4.65	4.76		V
Output leakage current ¹⁾	I_{LEAK}	$V_{DD} = 5V$		0.005	1	μA

Only for version B, H and N

Parameter	Symbol	Test Conditions	Min.	Typ.	Max.	Unit
Supply current	I_{DD}	$V_{DD} = 5V$, output open		19	31	μA
Threshold voltage	V_{TH}	B, H, N	2.56	2.65	2.74	V
Threshold hysteresis	V_{HYS}			32		mV

Table 9

- ¹⁾ Top marking is standard from 2006. No bottom marking exists. Where ## refers to the lot number (EM internal reference only)
- ²⁾ Top marking with 4 characters is standard from 2003. For lead-free/green mold (RoHS) parts, the first letter of top marking with 4 characters begins with letter "B" instead of letter "A". Bottom marking indicates the lot number.
- ³⁾ Top marking with 3 characters is kept as information since it was used until 2002. Where # refers to the lot number (EM internal reference only)

Traceability for small packages

Due to the limited space on the package surface, the bottom marking contains a limited number of characters that provide only partial information for lot traceability. Full information for complete traceability is however provided on the packing

labels of the product at delivery from EM: It is highly recommended that the customer insures full lot traceability of EM product in his final product.
